### RADIATION REPAIR FORMULA

CRAMSVLDJ<sup>®</sup> Ray Cover cream is an advanced treatment formula that recover radiation induced skin damage and promotes to heal it without any side effect.

# RAY COVER<sup>®</sup>

## CREAM

### ADVANCED FORMULA

**This cream combination is not the barrier of radiation therapy but protect skin from harmful effect of radiation.**

**Also recover the skin that damaged by laser therapy.**

# RAY COVER<sup>®</sup>

## CREAM

### KEY INGREDIENTS:

#### SODIUM HYALURONATE

Reduces dryness and flaking by increasing skin hydration.

**Reference:** In a randomized double blind placebo-controlled study of 134 radiation patients, 0.2% hyaluronate cream was shown to significantly reduce the incidence of high grade skin reactions, delay their onset & reduce their severity. The study also noted hyaluronate's association with faster skin recovery times. (Ligouri V. et al, Radioth Oncol. 1997; 2:155-161).

## CREAM

### KEY INGREDIENTS:

#### CALENDULA OIL

Calendula oil is a natural oil extracted from marigold flowers (*Calendula officinalis*). Calendula oil has antifungal, anti-inflammatory, and antibacterial properties that might make it useful in healing wounds, soothing eczema, and relieving allergy contact dermatitis.

**Reference:** In a prospective, randomized study of 254 radiation patients. Topical application of 4% calendula ointment resulted in far fewer occurrences of grade 2 or higher dermatitis than occurred in the group using Biafine (trilamine). Calendula users also experienced less radiation induced pain & fewer breaks in treatment (Prommier p. et al. J Clinical Oncol 2004;22:447- 1453).
